

Index

- Absorption, 42
- Actinides, 243, 257–9
- Albedos, 147
- Alpha and Beta particles, 5, 10, 11
- Americium, 258
- Atom density, 73, 81, 110, 225
- Atomic enrichment, 35
- Atomic mass, 7, 15, 18, 20, 49, 50, 51, 92, 94
- Avogadro's number, 19, 33
- Axial buckling, 182
- Axial distribution:
 - cosine, 193
 - power, 207
- Axial reflector, 181, 184

- Bessel functions, 149, 171, 173, 184, 204, 269, 270
- Billiard ball collision, 37, 41
- Binding Energy, Curve of, 7
- Boiling water reactors (BWRs), 88, 90, 91
- Boltzmann constant, 39
- Boron and gadolinium, 255
- Boron poison, concentration of, 109
- Boundary condition, 142, 144–7, 149–52, 159, 168, 169, 171, 182, 191, 192, 268
- Breit-Wigner formula, 44, 45
- Burnable poisons, 91, 186, 245, 255, 256

- CANDU reactors, 92–4
- Calandria, 92
- Carbon dioxide-cooled graphite-moderated systems, 92
- Cartesian geometries, 149
- Cesium, 246, 247, 258
 - decay of, 247

- Chain reaction, 12, 13, 15, 17, 18, 29, 57–9, 62, 69, 85, 87, 91, 115, 121, 124, 129, 133, 256
 - time-independent, 121
- Charge, conservation of, 3
- Circular fuel assemblies, 86
- Coal-fired power plant, 2
- Composite coefficients, 227
- Control Poisons, 186
- Coolant channels, 81, 85, 98
- Coolant temperature, 90, 93, 205–10, 212, 213, 223, 227–9, 233, 234
 - coefficients, 227
 - transients, 213
- Coolant velocity, 209, 210
- Core power distribution, 199
- Core-averaged power density, 200, 202, 210
- Cosmic rays, 18
- Coulomb repulsion, 8, 9
- Critical reactor, 160
- Criticality, definition of, 120, 122
- Cross section:
 - calculation, 36
 - energy dependence, 40
 - measurements, 80
- Crystal lattices, 80
- Cylindrical fuel element, 85, 93, 100, 205, 206, 208, 279
- Cylindrical geometry, 149, 173, 181, 202, 269, 280

- Dancoff correction, 105
- Decay chains, 21
- Definite integrals, 265
- Delayed neutrons, kinetic effects of, 212
- Derivatives and Integrals, 265
- Deuterium, 5, 9, 41, 51, 80, 91, 92

- Differential Equations, 267, 268
- Diffusion:
 - approximation, 142, 153, 276
 - coefficient, 142, 183, 277
 - equation, time-independent, 167
 - length, 154
 - theory, 153
- Divergence theorem, 187
- Doppler, 45, 104, 110, 134, 221, 223–5, 227, 228
 - importance of, 45
- Eigenvalues and eigenfunctions, 168
- Elastic collisions, 50, 51, 177
- Electrical repulsion of the nuclei, 8
- Electromagnetic radiation, 4
- Endothermic reactions, 3, 6, 7
- Energetics, 5
- Energy averaged reaction rates, 73
- Energy degradation, 48
- Energy from nuclear power, 1
- Energy release and dissipation, 10
- Energy self-shielding, 68
- Energy transport, 199
 - core power distribution, 199–200
 - finite cylindrical core, 200–203
 - uniform cylindrical core, 203–204
 - heat transport, 204
 - heat source characterization, 204–205
 - pressurized water reactor, 209–211
 - steady state temperatures, 205–208
 - thermal transients, 211–12
 - coolant temperature transients, 213–15
 - fuel temperature transient, 212–13

- Uranium-235, 9, 11, 15–17, 35, 58, 59, 129, 252, 255
 - depletion of, 255
- Uranium-238, 16, 17, 35, 42, 44, 46, 47, 49, 51, 58, 60, 61, 105, 228, 252, 253, 259
- Vacuum boundaries, 146
- Waste disposal, 258
- Water-cooled reactors, 72, 90, 93, 105, 254
- Wigner-way formula, 15
- Xenon, 243, 245, 247–51
 - poisoning, 247, 250, 251
- Zero flux boundary condition, 147, 176
- Zero power:
 - kinetics, 133
 - temperature, 232
- Zirconium, 90, 92, 93
